

ABSTRACT

The invention relates to a program that administers a method of funding life insurance policies using annuities that are purchased at least in part using borrowed money, using business and trust structures to reduce and/or eliminate tax. This investing can be done either directly by the policy or through the trust and/or other business entity. As an internal investment of the insurance policy the income generated by the annuity and the inside build-up are non-income taxable to the owner of the policy. The resulting death benefits will also be non-income taxable to the beneficiary.
